

NEED AN
ERGONOMIC,
HOMEWORKING
CHAIR?

WE'VE GOT YOUR BACK!

workspaces
by **JPA**

ORTHOPAEDICA

More of us than ever are working from home, that means we need to make our home space safe and healthy places to work.

TO HELP MAINTAIN GOOD POSTURE AND A HEALTHY BACK & SPINE IT IS ESSENTIAL TO ADOPT THE CORRECT SEATING POSITION. SITTING WITH A STRAIGHT BACK & SHOULDERS WILL IMPROVE A PERSONS WELL-BEING.

Orthopaedica assists in reducing back discomfort and enhances well-being to enable the user to work and perform to the best of their ability.

ORTHOPAEDICA PROVIDES FLEXIBILITY WITH A MULTITUDE OF OPTIONS. THERE'S SOMETHING FOR EVERY BODY!

Independent movement enables the seat & backrest angle to be adjusted separately, with the ability to lock in a fixed position – will freefloat if lever is left unlocked.

Fully synchronised mechanism enables the seat & backrest angle to be adjusted, moving together to the required position ensuring the correct ergonomic posture.

4. Headrest

The addition of an adjustable headrest supports the user in reclined positions, relieving stress within the neck muscles.

1. Seat Slide

A sliding seat adapts to different thigh lengths, allowing the user to optimise their own comfort and support.

2. Inflatable Lumbar & Thorax

By using the pneumatic pump, the lumbar or thorax can be inflated or deflated as required.

3. AirTech Seat

A push of the button allows air to flow through the two way valve; this enables the seat to move and mold to your natural shape.

5. Coccyx Cut Out

A cut out area for the coccyx, discretely covered by the seat fabric. This relieves pressure on this delicate area.

ORTHOPAEDICA 90SERIES

No Arms

OC94 Synchronised Mechanism
OC97 Independent Mechanism

Height Adjustable Arms
